

LinkedIn Learning for Library

Connect your patrons to trending, in-demand professional skills

Engage all members of your community with relevant learning through LinkedIn Learning for Library. Our robust course library is informed by insights from the world's largest professional network, allowing us to build courses that help your patrons keep up with the rapid, ever-changing demand for hard and soft skills. Patrons can leverage our platform to prepare for the future of work as skills become the top priority for job seekers and employers alike.

LinkedIn Learning for Library was built with our library customers and their patrons top of mind. This is why our library platform doesn't capture any personally identifiable information (PII) from patrons, honoring our commitment to privacy and confidentiality.

How we serve patrons

- Course libraries in seven languages—English, German, French, Spanish, Japanese, Portuguese and Mandarin
- Access to 16,000+ professionally-produced courses shot with Hollywood-level production quality, covering creative, business and tech topics
- 60+ courses are added each week taught by real-world experts
- Modern and intuitive user interface driving higher engagement
- Downloadable exercise files reinforcing retention

How we serve librarians

Simple & secure implementation

- Authenticates users through your Patron API or SIP2
- Supports MARC21 standards

Learn anytime, on any device

- Uninterrupted access via desktop or mobile app
- Works on Mac, Windows, and Linux

Access real-time reporting

- Provides insights on how your patrons are utilizing the platform
- Summarizes real-time and historical learning activity at the account level
- Measures number of logins, videos and courses viewed, total hours viewed, and more
