

Upskill on Artificial Intelligence (AI) and Generative AI

Build Critical AI/Gen AI Skills Across Your Organization with learning content mapped to LinkedIn Learning's AI Upskilling Framework

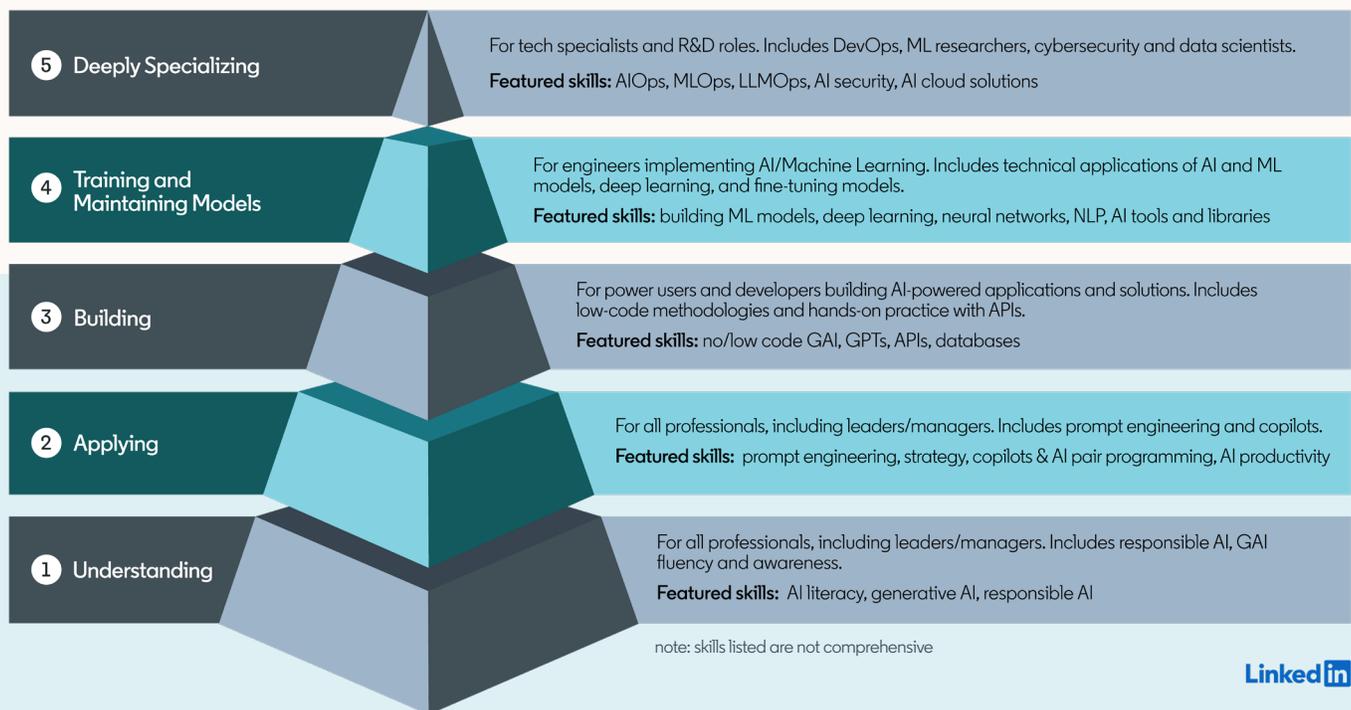

Globally, AI will change the skills required across most occupations. In fact, 82% of leaders say their employees will need new skills to be prepared for the growth of AI, and 4 out of 5 people want to learn more about how to use AI in their profession (LinkedIn Workplace Learning Report). It is then no surprise that Learning and Development teams are charged with upskilling their organizations on AI/Gen AI and aligning learning to business goals.

LinkedIn Learning's AI Upskilling Framework (pictured below) enables organizations to tailor employee development to specific functional and skill needs. Pictured below, AI/Gen AI skills range from essential AI knowledge for general fluency to in-depth expertise for specialized roles.

This on-demand content mapping makes it easy to create an individual, team, or organization-wide strategy by laying out LinkedIn Learning's extensive AI/Gen AI learning content according to our AI Upskilling Framework. With content available in multiple languages, with hands-on practice, and ways to prove skills, organizations can build critical AI/Gen AI skills.
